At the fire, this morning, the clothing of a number of firemen became completely saturated with water, freezing on their backs. From the effects of it one of them is today suffering from a cold. A fire alarm was sounded at half past three this morning for a blaze in the building occupied by Mrs. L. D. Lunt, in the alley opposite the office of Root and Horn. Chief Justice Shields on the application of some of our county officials, has issued an order compelling the Board of Supervisors of this county to set aside from the General Fund of the county a sufficient amount of money to pay the salaries of county officials as required by law. The first year we got rid of all heavy clothing as well as all colds and coughs. We each wore two Plasters on the chest and pit of the stomach for three or four weeks at a time, then washed the parts with alcohol and put on fresh ones; they appeared to warm and invigorate the whole body so that we never took cold."

A Popular Wedding.  
From copies of Topeka, Kansas, and Hot Springs, Arkansas, papers received at this office, we learn of the wedding of Miss Lotta Thomas, daughter of Hon. Chester Thomas, Receiver of the United States Land Office at this place. The ceremony was performed at the Hot Springs, where Miss Thomas was the guest of her sister, Mrs. C. N. Rix, wife of a wealthy banker there.

The bridegroom was T. J. Hankle, proprietor of the Fifth Avenue Hotel, Topeka, Kansas, and a very prominent young man. Mr. Thomas, father of the bride, at present a resident of Prescott, has been closely identified with the political history of Kansas from its earliest days, having filled numerous positions of trust and honor, and his name is familiar to all who know anything of the history of the state.

The wedding, as might naturally be expected, was a very brilliant affair, the presents reaching into the thousands of dollars in value, \$350 in each being sent by the relatives from here.

The Topeka Commonwealth speaks of the bridegroom as one of the brightest lights in business circles and of the bride as a young woman of rare abilities and qualities.

Nothing to Compare With It.  
SAN FRANCISCO, FEB. 25, 1898.  
JAY EYE SEE LUMBER CO., SAN FRANCISCO.—Gentlemen:

I have been driving trotting horses for the past fifteen years both in eastern states and here, and have used all kinds of liniment in the care of many horses that have been in my hands, but have never used any thing to compare with your liniment for bruises, sprains, contractions of muscles, cuts and galls. It has no equal and henceforth I use no other in my business.

Yours Very Respectfully,  
(Signed) ARTH. McDONALD.  
Dr. O. Lincoln, Prescott, Ariz., General Agent.

UNDER THE GALLOWS  
Frightful Condemnation of a Mother by Her Son.—What Reason is There?

Not long ago a weeping mother called to bid good-bye to her only son, who was about to be executed. She was a woman of noble character, and her son was a man of noble character. The mother's tears were for her son, and the son's tears were for his mother.

"Woman," he exclaimed in a momentary frenzy, "Woman, I would never have been here had you done your duty by me when I was young."

This was a terrible parable! It horrified the spectators; it nearly crazed the executioner's nerves. The mother's influence in the moulding of the character of her offspring. But how often, oh, how often, do mothers seek to ignore this responsibility!

During a recent trip on the rail, the writer made the acquaintance of Dr. J. B. Benedict, of Sackett's Harbor, N. Y., a person who has made a study of human development. Referring to the mother's tendency of the times, we asked that eminent man if the outlook was not discouraging.

"It looks so," he said, "but I fancy we have a cause and the remedy for such evils. In my professional career I have found by hard study that we have emerged from savagery by development of the nervous system and the intellectual life, and we return to savagery as we ignore the fact that without the solid, trustworthy, nervous system, we cannot hope to save the race. Boys stuff their minds with the most useless and unimportant facts, and the result is that they are not able to do the things that are really important to the race."

"Do you regard it as a disease?" "More especially as the result of disease, which, however, may be prevented."

"I cannot now enter into details. Our people can see their bodies, their blood, their bones. They never see their nerves and consequently may do not suppose they have any. The farmer's wife rejoices in a big, physical frame, and yet she is a nervous wreck. The nerve can stand the strain of continual work. The minister finds fault in his pulpit, but he never did a day's physical work in his life. The lawyer finds fault in the pressure of the court and is soon a wreck or a corpse, and yet the work is nerve work. The man of affairs is overcome with apoplexy; the politician and publicist, with Bright's disease. The mind of the untutored man is freed by the exploits of crime, and he longs for such fame. These persons overwork or over-excite the nervous system, and this fact kills or demoralizes them."

"If all this be so, how would you rectify it, then?" "Let me tell you. A few years ago I had a lady patient who was an utter wreck. She was the mother of several children. She lost her mind and imagination, and she was a nervous wreck. I never saw a finer specimen of physical womanhood than she, but she was a nervous wreck. She became bloodless, had the worst of female disorders, and was in the last stages of tuberculosis or Bright's disease. This last disease works particularly havoc with the nervous system and produces insanity and despair. She was a nervous wreck and I fear tainted the blood of her offspring with these terrible tendencies. I treated her for several years. One by one the standard remedies of the schools failed, but I finally cured her with Warner's Safe Cure, and she is to-day strong and healthy. Yet thousands of women, like her, every year bring ill-formed and criminally-inclined children into the world. Is it any wonder that nervous diseases prevail and that the whole moral sense is demoralized? If that remedy were generally used, we would have stronger mothers, stronger children, stronger men and women, and with perfect physical and mental health, crime would decrease and society be more secure."

Such candid opinions are surely worth considering.

DEED.

A Case of Love.  
The damage resulting from yesterday's attempt at suicide at Whipple, is of such a nature that hereafter when a count of noses is called for in a company, where the victim is present he will be counted out. The audacious manager of death, which he intended should snuff out his existence, only succeeded in carrying away a large portion of his nasal organ. The name of the would be suicide is Eugene Volcanse. Some time since he became enamored of the beauties of a daughter of Ham in one of the eastern cities and recently sent her money to join him here. On her arrival she found the acquaintance of another member of the regiment who possessed greater charms for her than "Gene," and giving him the cold shoulder, it so preyed on his mind, that he resolved to end his existence, but in his attempt to do so only deprived himself of his nose.

An Indignant Warrior.  
The following soliloquy published in the Tombstone Epitaph, one might think was declaimed by General Wardwell, in absence of any name being given by that paper: "D—n it, sir!" said he testily, "here I've been waiting for four years, and the good of a jump my ranch! By the Eternal! but it is a little too much. I could have stood the blow to my young affections, but they ought to have spared my property. D—n it, sir, I'll have the next legislature pass a bill making it felony for a girl to triffl with a man's heart, let alone his property!" And the old hero of two wars stalked off majestically, sniffing the atmosphere and muttering imprecations.
